

Tech wizard club

Tech Wizard is a computer science community, which is conducted by the students of computer science and engineering branch of the college DR. KNMIET working together as a team in running this club. We are working with the sole aim of providing a platform for the second year students of the department for their all around development. We conduct technical events that help the participants to sharpen their technical skills and also verbal events which help them in enhancing their communication and presentation skills.

Events conducted in tech wizard are

1. Techno Quiz

This event consisted of the images of the fortune 500 companies and also the audio clips of the important personality. These were used to check the ability to recognize things and how to react in the critical situation.

2. Flamitage

It has two rounds First round is Apti Round was implemented to play with the random numbers and also to make the participants accessible for the first round of any placement drive. And second is Memory Optimization Round was to reduce the fear of the stage and audience interaction has to be increased in this round, we have also focused on the extempore to increase the thinking capability of the participant in a limited period of time.

3. Networking

For the discussion of networking paradigm various topics Structured Cabling Introduction to IP, Subnetting and VlsM Routing ,Basic, Unix Concepts Commands and Utilities, KDE (Linux) ,Networking with Linux (with Installation) ,Telnet and Ftp configuration ,DNS configuration ,Apache web server configuration ,Live dns, web server and ftp configuration.

.4. Minute-To-win-It & AD-Mad

Extempore is needed everywhere to overcome the hesitation and to develop the confidence we are able to conduct the events related to this. Thinking and speaking for any topic matters a lot in achieving the attraction of the audience.

5. Cloud computing and Android

Latest storage paradigm is cloud computing and to configure the desired area we have also conducted this workshop for the benefit of the students.

6. Debug-It

Covering from basics to the higher level coding paradigm was covered in the certain event to check up the logical level of thinking and the concept behind to solve a problem.

7. Group discussion and personal interview

Our main focus is to establish a level of self-confidence and eliminate the fear to lose in front of the audience in any participant in our event. Confidence shows the talent and opportunity to cope with the world in the present or in the future aspect. Physical as well as mental appearances are the basics of the individual to present his/her image in the society

8. Learn –It

For this event we have planned and implemented lectures on the latest technology such as quantum computing, holoportation, Photoshop, Linux, os and many more. These events definitely cover up the gaps between the normal lectures and the future aspect of the industry.
